## 2. TYPICAL PROGRAM OF STUDY

Identify length of term/semester and relation of contact hours to unit/credit hours. List courses (instructional units) for a typical program of study, using the format given below.

**Instructions:** 1. List specific LA courses required (e.g., LA 31 Landscape Architecture Studio 4). Course numbers must correspond with those used in other sections of this report. 2. Show group or controlled elective requirements by title (e.g., Social Science Elective, Planning Elective). 3. List free electives as "Electives." 4. The sequence of courses is to be typical student coursework. 5. Reproduction of appropriate pages from the program catalog may be used for this description providing they contain the required information.

The Landscape Architecture program offers first professional and post-professional graduate courses leading to the Master of Landscape Architecture (MLA) degree. The first professional degree program (90 credit hours) is for students without a professional degree in landscape architecture or related discipline. The post-professional degree program (60 credit hours) is for students with a professional degree in landscape architecture or related discipline. This advanced standing status is evaluated on a case-by-case basis and is determined in accordance with prior academic accomplishments (as demonstrated in the application portfolio and transcript).
