

IMPROVING TRANSPORTATION ALTERNATIVES FOR YOUTH PUEBLO, CO

This project was based in Pueblo County, Colorado and its goal was to research transportation alternatives to driving for improving youth accessibility to prosocial activities. Pueblo had surveyed where youth wanted to go and what was stopping them from getting there but needed a set of recommendations to address the identified barriers. Utilizing guidance from the National Association of City Transportation Officials, case studies from other cities, and by studying the existing conditions of Pueblo, the project delivered four general recommendations with applications to specific locations in Pueblo.

Recommendations

- 1 MAKE AREAS NEAR YOUTH SPACES SAFER** → Improve basic safety infrastructure at an intersection next to a movie theater
- 2 IMPROVE ROUTE KNOWLEDGE AND CONNECTIONS** → Add confirmation bike route signs between a bike route and a multi-use path
- 3 PROVIDE ALTERNATIVE MODES** → Add a bike share kiosk at a youth space within biking distance to Pueblo Lake State Park
- 4 BUILD CAPACITY** → Partner with the school district to apply for non-infrastructure Safe Routes to School grants
