

# 40 West ArtLine

## URBAN DESIGN + MOBILITY ENHANCEMENTS

### THE PROBLEM

The ArtLine has seen great success since its launch in 2018. However, the City of Lakewood needs more feedback in the form of qualitative data and trail user feedback. The city hopes to improve pedestrian and bicycle infrastructure and connectivity to community amenities by activating corridors along the ArtLine, and wishes to better understand how the ArtLine can be maintained and funded in the short and long-term.

### THE VISION

Create a GIS database of trail features and gather property owner, business owner, employee, and other community member feedback to guide further development of the ArtLine as an active transportation experience, placemaking tool, and community connector.

### STEP 3: IDENTIFY PRIORITY AREAS

### STEP 1: EXISTING CONDITIONS

- 5+ SITE VISITS
- 91 MOBILITY ELEMENTS
- 213 PLACEMAKING ELEMENTS
- 101 WAYFINDING
- 136 ART PIECES

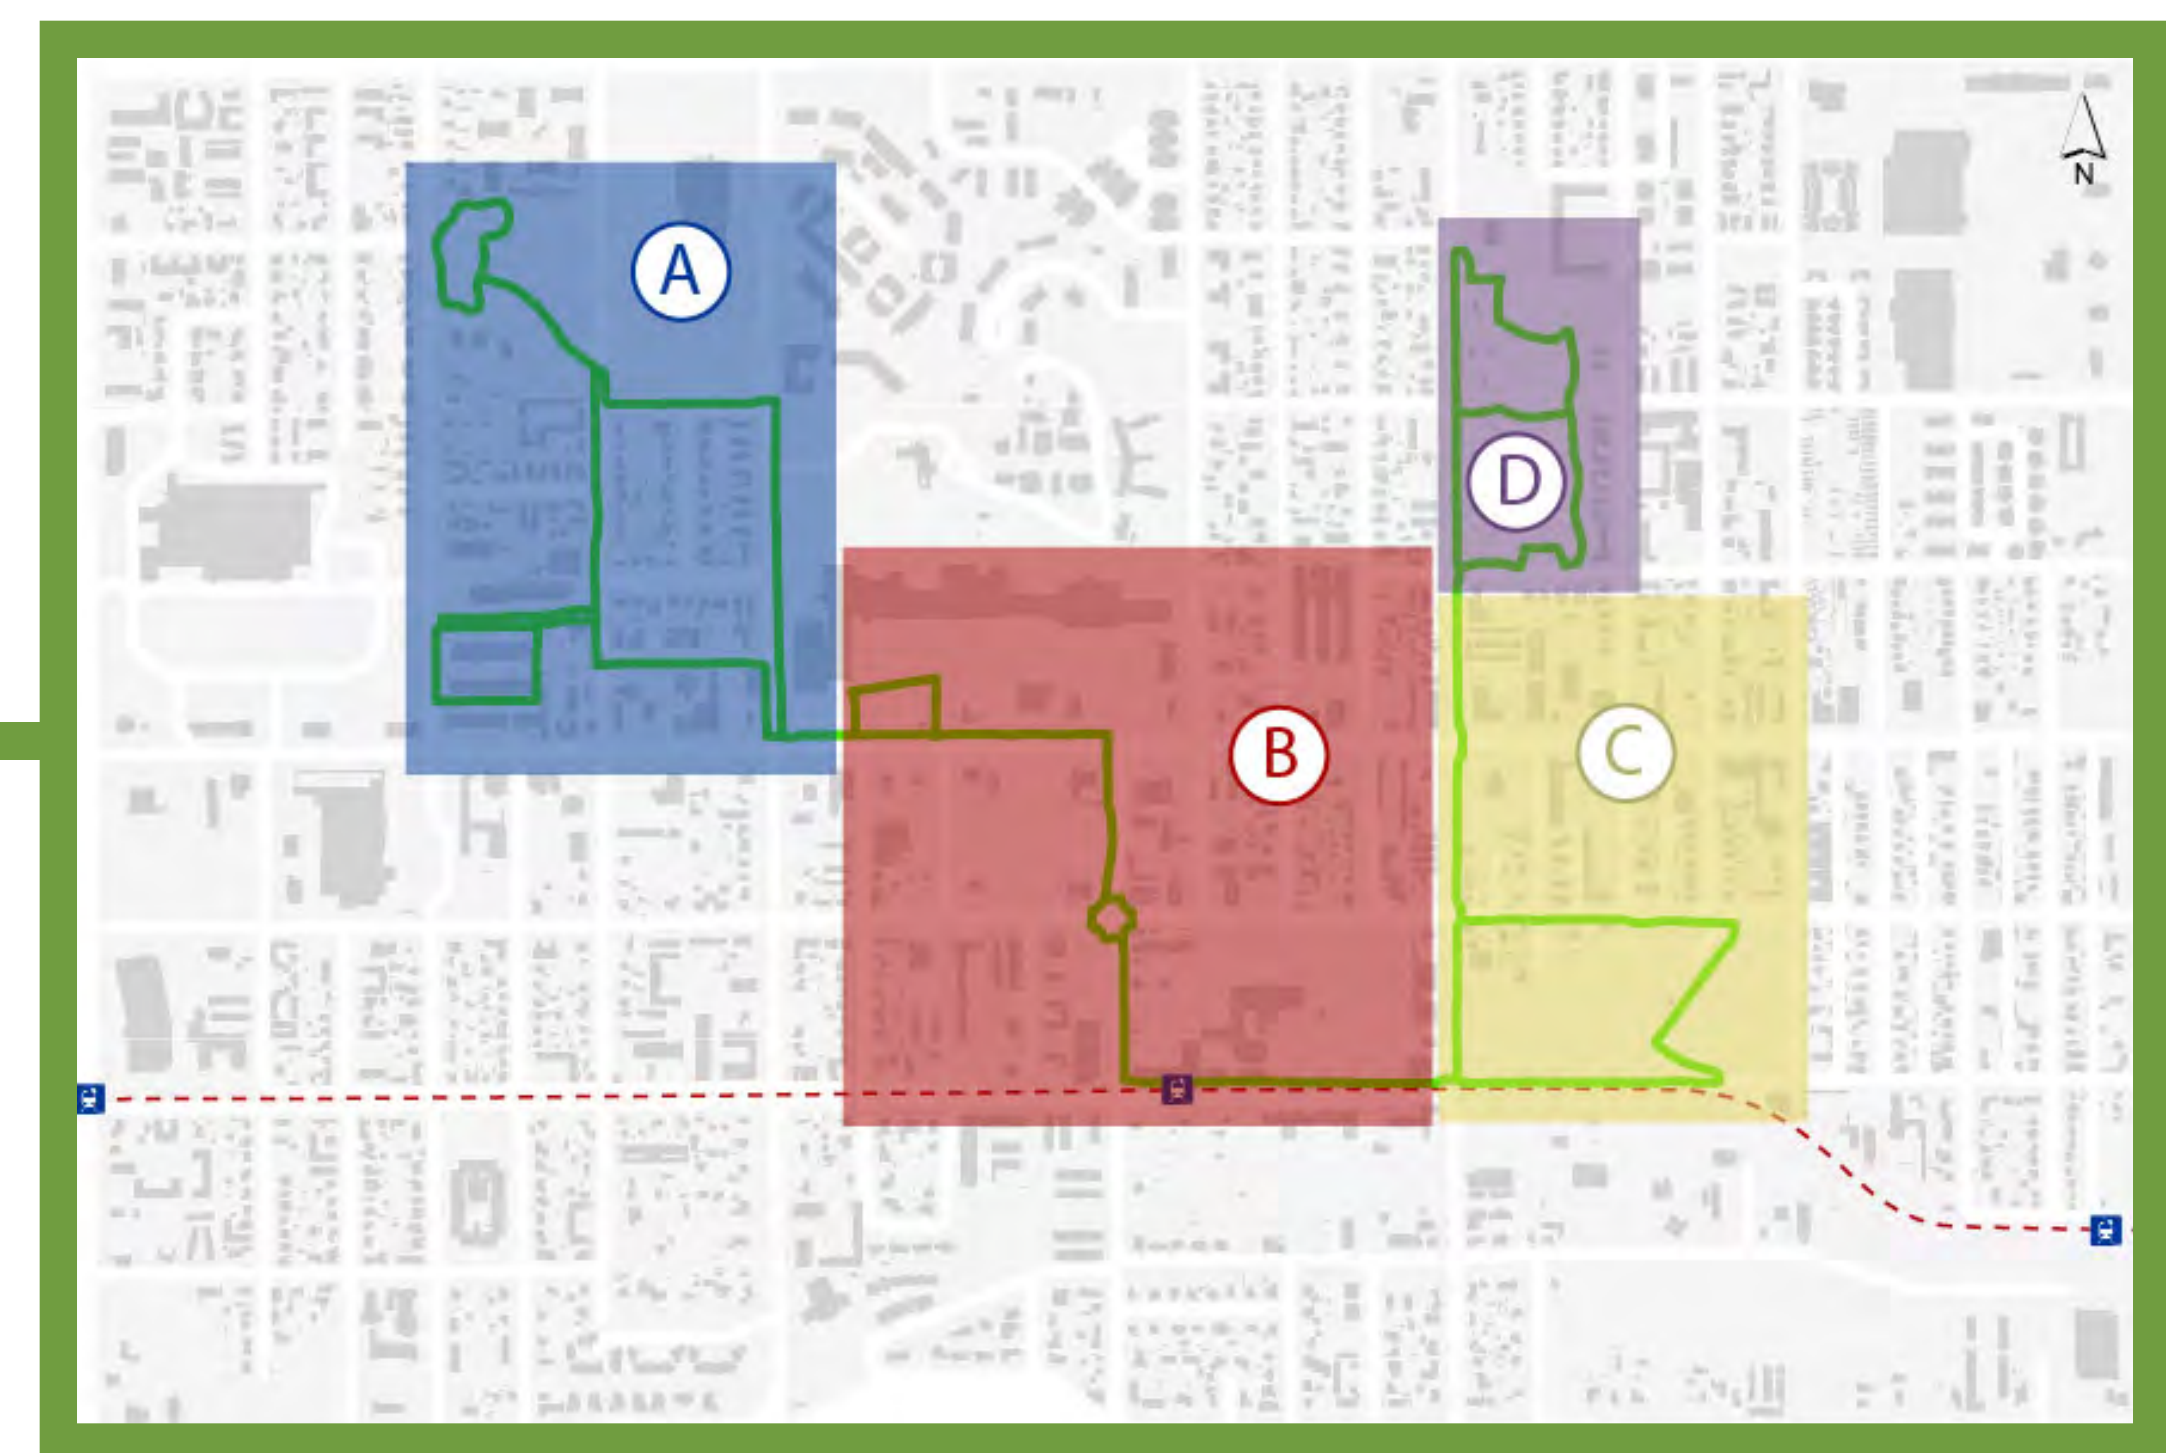

### STEP 2: COMMUNITY SURVEY

#### MAIN AREAS OF CONCERN

- 1 LIGHTING GAPS
- 2 LACK OF AMENITIES
- 3 POOR SIDEWALK & CROSSWALK CONDITIONS

### STEP 4: RECOMMENDATIONS

Sarah Grossi + Nikisha Mistry
