2021 Fall Research Showcase

Integrated Solar Energy for Sustainable, Resilient, and Equitable Communities

SERENA KIM, SCHOLAR IN RESIDENCE, SCHOOL OF PUBLIC AFFAIRS

Project Purpose and Objectives

1. How does rooftop solar deployment vary across neighborhoods?
2. What are the determinants of rooftop solar deployment?

Analytics

- **Census Block-Group Level:**
 - ✓ Demographics (US Census)
 - ✓ Housing Characteristics (US Census)
 - ✓ Electricity Price & Service Provider (NREL)
 - ✓ Solar Irradiance (NREL)
- **Census Tract Level:**
 - ✓ Natural Hazard Risk Index (FEMA)
 - ✓ Urban-Rural Classification (USDA)
 - ✓ Tree Canopy Cover (USFS)
 - ✓ Transmission Lines (HIFLD)
- **City/County Level:**
 - ✓ Permitting and Inspection Rules (NREL)

Determinants of Rooftop Solar Deployment

- The asterisks (*) indicate statistical significance in bivariate OLS.
- The composite Feature Importance Score (FIS) is the average of the standardized FIS calculated separately in four (4) models predicting solar system count and the size of rooftop solar areas per household using Random Forest and XGBoost Regressor.

Future Research: Solar + Vehicle-to-Grid + Microgrids

EVs as a Tool for Energy Efficiency and Resilience

Do you have a few minutes to participate in our survey on EV charging?

Take The Survey!

The University of Colorado Denver is conducting research on how electric vehicles (EVs) can be fully integrated with power grids. We'd love to hear from you about how you may charge your EV. The results of this survey will inform our public policy recommendations related to the Vehicle-to-Grid (V2G) and Vehicle-to-Building (V2B) technologies.

This survey only takes 8 - 13 minutes. The survey is closed on November 12, 2021. You must be 18 or older to participate. This study has been approved by the University of Colorado IRB, as protocol #21-4596. If you have any questions about the survey, email us: hilary.haskell@ucdenver.edu; serena.kim@ucdenver.edu

As a thank you for sharing your input, 10 completed survey respondents will each receive a \$50 Amazon gift card.

Willingness to Use V2G/V2B

Participants

- Serena Kim (School of Public Affairs; College of Engineering)
- Raven O'Rourke (Undergraduate Student, Computer Science)
- Koushik Ganesan (PhD Candidate, Physics, CU Boulder)
- Crystal Soderman (PhD Student, School of Public Affairs)
- Dan Connors (Associate Prof., Electrical Engineering)
- Will Swann (Assistant Prof., School of Public Affairs)

THANK
YOU!
